Jul 2024 – Present
Stack: Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, WordPress, Elementor, Yoast SEO, TranslatePress, ECharts, D3.js, Leaflet, Git/GitHub, Vite, Azure, Firebase.

- Lead a team of UI developers, managing task allocation, progress tracking, technical guidance, code support, and delivery coordination.
- Develop and maintain responsive, accessible web interfaces using Angular, TypeScript, JavaScript, HTML5, SCSS, Bootstrap, and modern CSS.
- Design, develop, and maintain WordPress websites using Elementor, ACF, Yoast SEO, and TranslatePress.
- Deliver UI improvements, reusable components, interactive dashboards, data visualisations, responsive layouts, and performance optimisations.
- Manage multilingual website updates, content publishing, SEO improvements, PDF/media integration, and cross-browser compatibility.
- Provide technical mentoring, troubleshoot complex UI issues, and establish consistent UI standards and development practices.

UI/UX Developer | JindalX, Delhi
Sep 2023 – Jul 2024
Tech Stack: Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, Node.js, Vite, Leaflet, Git/GitHub,

- Collaborated with Product Managers and Account Managers to translate client requirements and change requests into functional frontend enhancements.
- Developed responsive, cross-browser-compatible user interfaces using Angular, HTML5, CSS3, SCSS, and Bootstrap.
- Implemented client-specific UI modifications and frontend feature updates, ensuring alignment with business requirements and design specifications.
- Built intuitive, visually consistent Angular components and screens to improve usability and deliver a seamless user experience.
- Optimised frontend performance, page loading speed, and SEO-related elements to improve application efficiency and accessibility.

Web Developer — Netision Technology LLP, Noida
Oct 2022 – Sep 2023
Stack: WordPress, Elementor, HTML5, CSS3

- Developed and designed multiple dashboard interfaces using Elementor and WordPress.
- Conducted UX research and applied UX strategies for a healthcare product, contributing to improved user interactions and satisfaction.

- Built responsive HTML email templates with consistent visual clarity across clients.

Web Development Engineer — Coforge (Insurance & Travel domains), Noida
Aug 2019 – Oct 2022
Stack: JavaScript (ES5/ES6), TypeScript, Angular, Node.js, Figma

- Partnered with product managers and UX designers to translate project requirements into rich, functional user interfaces.
- Improved and expanded project platforms using JavaScript, TypeScript, Node.js, and Angular; developed interfaces for the Sabre travel platform.
- Created a decision tree, user personas, mock-ups, and prototypes for an American Airways project, driving user-interview-informed interface design.
- Collaborated with Product Managers and the Vertical Head to align design and delivery.

PROJECTS

Invoice Management Application | *Angular, TypeScript, Firebase, Cloud Firestore* *Live Demo* | *GitHub*

- Developed a responsive invoice management app with Firebase authentication and secure, user-specific invoice storage.
- Implemented CRUD operations and Firestore security rules to protect user data.
  Demo Email: email@example.com
  Demo Password: niha08

Niharika Clothing | *HTML5, CSS3, JavaScript* | *Live Demo* | *Github*

- Developed a modern, responsive clothing website showcasing a curated streetwear collection.
- Designed a minimalist UI with bold typography, a monochrome palette, and gold accents.
- Implemented interactive product galleries featuring front and back garment views.
- Created an engaging browsing experience with newsletter signup and shopping FAQs.

QR Code Generator | *JavaScript, HTML5, CSS3* | *Live Demo* | *GitHub*

- Developed a QR Code Generator that converts user-provided text and URLs into scannable QR codes.
- Designed a user-friendly interface with a focus on simplicity, usability, and responsive design.
- Implemented QR code generation functionality to simplify sharing digital information.

100 – NextGen UI Challenge | *HTML5, CSS3, JavaScript, LocalStorage* | *Live Demo* | *GitHub*

- Developed a responsive, interactive progress tracker for a 100-day frontend challenge.
- Designed a vibrant gradient UI with smooth interactions and intuitive day-wise navigation.
- Implemented real-time progress tracking and task completion status.
- Used LocalStorage to persist progress without login or backend integration.

Expense Tracker | *Angular 21, TypeScript, HTML5, CSS3* | Live Demo | Github

- Developed an interactive expense tracking application using Angular 21.
- Designed a responsive UI for a seamless expense management experience.
- Implemented expense tracking features to help users manage and monitor expenses.
- Built and deployed the application using Vercel.

RESEARCH & WRITING

- From Collaboration to Commercialization: Unveiling a Harsh Reality
- Unlocking Convenience: Why Rapido Excels Over Ola and Uber
- Colour Choices as Key to Crafting Engaging, Intuitive User Experiences (Logo Colour Wheel, Confirmation Bias)

EDUCATION

B.Tech, Computer Science — APJ Abdul Kalam Technical University (AKTU), UP
2015 – 2019 | 74%
